

Automated Blinds

Solutions that put you in control

 **LUTRON**

The transformative power of light

Think about how your mood changes when a drab, cloudy morning turns into a sun-kissed day, and then that bright afternoon sun softens into an evening dusk. You go from feeling lackluster to energised and then relaxed.

The reason is light.

Light not only changes the look of the day, but also affects the way you feel. Wouldn't it be nice to adjust the amount of daylight in your home to complement your mood and even transform it?

With Lutron, you have the power to do that. The press of one button can shape the lighting in a space to create the perfect atmosphere for any activity.

The Lutron difference

- We have over 20 years of experience and knowledge in the motorised shading industry, and we are the world leader in precision controlled motorised blinds.
- We provide the entire shading solution—the blind itself, electronic drives, controls, power supplies, and hardware—ensuring the highest-quality products and a satisfying customer experience.
- We offer the widest breadth of line, with eight blind styles and over 1,500 materials and fabrics for any budget or application.
- We pay exceptional attention to detail, for functional—and beautiful—controls, and offer a wide selection of styles, colours, and finishes.
- We offer seamless integration of daylight, electric light, security systems, and HVAC systems, for total home control solutions that help save energy.
- We work with best-in-class home solutions to provide ultra-reliable blind (and light) integration with your favorite brands.
- We provide global 24/7 customer support.

Palladiom roller blinds

Palladiom roller blinds are in a class by themselves. Sleek and sophisticated, they feature exposed bracket hardware designed specifically to be seen. The bracket, together with the roller tube's slender profile and carefully balanced bottom rail, take this distinctly crafted motorised solution to new heights.

Palladiom bottom rail

Designed to fit anywhere

Palladiom seamlessly blends into any architectural style. Mount on or above the window frame to highlight the handsome, circular jamb bracket, or sit Palladiom elegantly inside the frame.

Center Bracket

Jamb Bracket

Coordinating Palladiom controls

Block midday glare with one touch of a Palladiom keypad, which complements Palladiom blinds and temperature control for a sleek, coordinated aesthetic.

You can also add Lutron lighting control to any Lutron motorised shading solution, for convenient control of lights as well as shades.

ROLLER BLINDS

Roller blinds

Roller blinds complement both traditional and contemporary designs and are available in different sizes to accommodate the needs of any room.

Choose from hard-wired or battery-powered options.

Precision control

All Lutron blinds feature intelligent hembar alignment, which was designed to synchronize all motorised blinds in a single room, or in an entire home.

Hard-wired fascia options

Pocket—recessed into the ceiling, pocket fascia creates a seamless transition between the ceiling and blind.

Fascia—this decorative cover conceals the roller and is ideal for more conventional spaces; it's available as round or square.

Round

Square

ROLLER BLINDS

Fabric opacity

Sheer

- Open weaves preserve views to outside and filter sunlight
- Ideal for rooms where you don't need complete privacy

Translucent

- Tighter weaves transform harsh daylight into a soft, filtered glow
- Provides increased privacy for spaces like bathrooms

Room darkening

- Opaque fabrics block light from entering a space
- Ideal for bedrooms and media rooms for complete privacy

Battery-powered roller blinds

Battery-powered blinds are cost-effective, easy to maintain, and ideal for areas that require a wire-free solution.

Battery basics

These blinds use regular store-bought batteries, with battery life dependent on blind size, fabric type, and the number of times the blind is opened and closed every day. That means the blind has the potential to move thousands of times on a single set of batteries.

The batteries are located within the headrail; simply tip the headrail forward to reveal the battery tray, without taking the blind down.

Blind sizes

Standard battery-powered roller blinds are available as wide as 2.4m and as tall as 3.6m.

You can also choose an option, called WIDR, that accommodates blinds larger than 2.4m wide.

Battery-operated fascia options

Architectural—provides a clean and contemporary aesthetic for spaces that require a modern finish.

Fabric-wrapped—ideal for applications with a more traditional design aesthetic, fabric-wrapped fascia provides a finished look with matching fabric.

Exposed standard—this versatile design can be hidden with custom top treatments or left exposed for a more industrial look.

Exposed WIDR—the same basic look as exposed standard, but with a different bracket design (shown right).

HONEYCOMB BLINDS

Honeycomb blinds

Honeycomb blinds add luxury to a space with their elegant textures, as well as depth, thanks to their cellular design—which also provides superior insulation.

Choose from battery-powered or hard-wired options.

Precision control

All Lutron blinds feature intelligent hembar alignment, which was designed to synchronize all motorised blinds in a single room, or in an entire home.

Top treatment

A color-matched headrail can be installed on its own or paired with your own top treatment.

Fabric opacity

Sheer

- Daylight transmits through the blind
- Fabric also allows views to the outside

Light-filtering*

- Daylight transmits through the blind
- Fabric limits views to the outside

Room-darkening**

- Completely blocks light through the blind
- Completely blocks view to the outside

Battery-powered honeycomb blinds

Battery-powered blinds are cost-effective, easy to maintain, and ideal for areas that require a wire-free solution.

Battery basics

Like battery-powered roller blinds, these blinds use regular store-bought batteries, with battery life dependent on blind size, fabric type, and the number of times the blind is opened and closed every day. That means the blind has the potential to move thousands of times on a single set of batteries.

The batteries are located within the headrail; simply press the release buttons to tip the headrail forward, revealing the battery tray, without taking the blind down.

Cable-guided options

Cable-guided honeycomb blinds move smoothly and quietly along vertical cables that are mounted to the outside of a door or window frame. These cables prevent blinds from swaying, making the blinds ideal for doors or areas of heavy airflow.

Horizontal sheer blinds

Horizontal sheer blinds pair the soft elegance of a sheer with the precise control of a blind. Sheer layers also offer privacy, even when vanes are open.

Fabric vanes tilt in precise increments between open and closed positions, aligning perfectly across adjacent blinds.

Roman blinds

Roman blinds give you the advantage of using your own material, while still reaping the benefits of Lutron technology. This style gives you a lot of flexibility not only in fabric options, but also in the number of pleats you want.

Precision control

Like the other styles of Lutron blinds, Romans feature intelligent hembar alignment, which synchronizes all blinds in one room or throughout a home.

Curtain track systems

Curtain track systems electronically operate pinch pleat or ripplefold curtains to elegantly provide quiet, convenient daylight control. As with Roman blinds, you can also use your own material for curtain tracks.

Curtain sizes

Lutron curtain track systems provide a wide range of options to suit your needs. Our systems allow for tracks up to 9.1 m long, single or multi-bend curved tracks, manual-open override, track splicing, 90° curves, and more.

Draw styles

Right Draw—the drive is located on the right-hand side, and the carrier opens curtains from the left toward the right. (Drive remains hidden behind the stackback.)

Left Draw—the drive is located on the left-hand side, and the carrier opens curtains from the right toward the left. (Drive remains hidden behind the stack back.)

Center Draw—one drive uses two carriers to open the curtains from the center to the left and right simultaneously. (Drive can be located on the left or right, right side shown in photo, while remaining hidden behind the stack back.)

Straight track

The straight track system is available in the following configurations:

- Single or dual track
- Standard single track with lengths up to 5.4 m; up to 9.1 m spliced; up to 18 m for spliced, dual track systems

Curved Track

Curved tracks are available in a standard arc or by custom specifications.

- Standard arc: 90° bend with 0.5 m radius
- Custom: up to 90° bends are possible; curved radius must be 0.5 m or greater
- Center draw and single draw versions are available

Pleat styles

Pinch Pleat—the style is named for the pleated look created by pinched gatherings of the fabric at the top of the drapery. Pins on the back of the drapery are simply looped through the carriers on the track when installed. For the best system performance, a drapery hook setting of .01 m from the top of the drapery should be used.

Ripplefold—the style is named for the soft, consistent ripples created by the drapery as it hangs from the track. The drapery is constructed with Graber snap tape that allows it to be snapped directly to the carriers on the track. Fullness of the drapery is determined by the carrier spacing. Lutron ripplefold tracks are available in three fullness factors: 80%, 100% and 120%.

Mounting options

Choose from wall or ceiling mount.

VENETIAN BLINDS

Venetian blinds

Venetian blinds are an attractive and effective way to ensure privacy while still allowing sunlight to filter into a space. Only Lutron Venetian blinds offer independent lift and tilt, for precision alignment of both tilt and lift positions between multiple blinds. These blinds also feature intelligent hembar alignment, for hembar position between .31 cm between shades.

Closed

Kirbé vertical curtain track system

An industry first, the Kirbé vertical curtain track system smoothly pulls fabric up and completely out of the way, unlike traditional curtains that move from side to side. This unique design provides greater access to views by eliminating stackback.

For floor-to-ceiling glass, the Kirbé can be recessed into the ceiling, leaving the top of the window unobstructed. This curtain track can also provide a dramatic way to reveal the screen in a home theater.

Add a decorative cornice for a stylised finish with no need for a recessed pocket.

Control styles

You can choose keypad styles to complement a room's look and feel, and to coordinate with the overall design of your home.

Inspiring fabric collections

Choose from four stylish collections within the Lutron Design Collections, as well as from sophisticated fabrics in The Essentials Collection.

The Lutron Design Collections

The Lutron Design Collections is our newly refreshed and redesigned fabric offering. Curated from leading manufacturers all over the world, the Design Collections bring Lutron window treatments to the forefront of fashion. Created for high-end residences, these four fabric lines encompass over 1,500 fabrics.

The Gallery Collection

The Gallery Collection is an extensive line of fashion fabrics for roller shades, horizontal sheer blinds, pleated blinds, and honeycomb blinds.

The Avant Collection

Beautiful, sophisticated soft fabrics and natural woods define this collection of traditional curtain, Kirbé vertical curtain, venetian blinds, and Roman blinds.

The Classico Collection

This collection of performance fabrics is available for roller, tensioned, and cable-guided blinds.

The Atelier Collection

The Atelier Collection is a curated collection of roller shade fabrics that balances design and function. The collection is organized by color and each deck includes select colors for the fabric family.

Lutron web-based fabric application

Order samples and start shopping today! Go to lutronfabrics.com and browse the Gallery, Classico, and Essentials Collections, application images, or shade types, as well as zoom in on fabric swatches to see greater detail. You can save, print, or email favorites, and order samples straight from your mobile device.

Custom fabric programs

Customer's Own Material (COM)

Curtain or Roman Blind

We recognise the unique nature of your projects and the need to match or coordinate window treatments with existing furnishings. This service allows you to select materials outside of our standard offering, giving you the freedom to create your own design while still providing the reliable motorisation of Lutron.*

Custom Printing

Traditional or Kirbé vertical curtain and roller blinds

Give your space a personal touch by reproducing a favorite painting or custom design on a Lutron approved fabric. You can choose to supply your own design or can choose from one of our pre-designed patterns below. In just three easy steps you can select your print, email your request, and then approve your proof and place your order.*
